Sameer Ali

Software Developer · React/Node.js · Cloud · AI/ML

☎ +91 8306690288 | ✉ sameersheikh0288@gmail.com | [LinkedIn] | [GitHub] | [Portfolio]

Professional Summary

Software Developer with **2.5+ years** of experience building cloud-based full-stack services in **React.js, Node.js, and Python**. At Kuanta, built and shipped an AI-powered vector-search platform (Milvus) processing 3M+ records to power an LLM-driven deal-scouting model – hands-on familiarity with LLMs, embeddings, and model integration into production systems. Comfortable across PostgreSQL, MongoDB, and Redis, with production reliability experience (root-cause analysis, query optimization) from a large-scale banking platform (SBI YONO 2.0) at TCS. Strong CS fundamentals (**250+ DSA** problems solved) and genuine curiosity to learn new stacks.

Technical Skills

- **Languages:** Java, Python, JavaScript, TypeScript, SQL, C++
- **Frontend & Backend:** React.js, Next.js, Node.js, Express, FastAPI, REST APIs, Microservices
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis
- **AI/ML:** Vector Databases (Milvus), LLM Integration, Embeddings, Generative AI Workflows
- **Cloud & DevOps:** AWS, Docker, CI/CD, Git, Agile/Scrum

Professional Experience

Techdome **Jun 2026 – Present**

Software Development Engineer – 1 (SDE-1) *Indore, India*

- Develop and maintain backend features for a healthcare EMR platform using Node.js/Python and PostgreSQL, including the subscription and billing module and usage-based access control.
- Optimize data access on large production datasets by re-working queries and indexing strategy, reducing page load and API response times for high-traffic EMR modules.
- Collaborate within an Agile cross-functional team – product, QA, and DevOps – participating in code reviews to enforce coding standards and catch issues early.

Kuanta **Dec 2025 – Jun 2026**

Software Engineer — Full Stack & AI Systems *Remote*

- Built a **Python/FastAPI** backend service that scrapes and vectorizes **3M+ startup and investor records** into **Milvus**, powering an LLM-driven deal-scouting model for startup discovery.
- Designed REST APIs and data pipelines to structure, clean, and normalize the scraped dataset, handling data consistency and performance bottlenecks at scale.

Tata Consultancy Services (TCS) **Oct 2024 – Dec 2025**

Assistant System Engineer — Full Stack Development & Production Support *Mumbai, India*

- Worked on the **SBI YONO 2.0** banking platform, including UI-side debugging and integration with backend microservices, plus PostgreSQL query optimization (**∼30%** latency reduction) and Grafana monitoring.

Markoknow **Jan 2023 – Sep 2024**

Full Stack Developer *Remote*

- Built backend services and APIs for a SaaS platform using Node.js and Redis, achieving a **∼60%** reduction in response times.

Key Projects

MPRAR — Workforce Management CRM (Live) **Mar 2026 – Present**

React.js, Node.js, PostgreSQL

- Freelance contribution to a UK-based workforce management CRM with two portals (Central and Pulse) covering clock-in/out, HR management, training management, and leave management.

Movie Library Web Application (GitHub | Live) **2024**

React, Node.js, REST APIs (TMDB)

- Built a full-stack movie discovery app with a React frontend and Node.js backend, consuming the TMDB REST API to handle dynamic search queries over a large dataset.

Education

Rajasthan Technical University **2020 – 2024**

B.Tech — Computer Science (Artificial Intelligence) *CGPA: 8.95 / 10*

Senior Secondary (Class XII), RBSE

93% Overall (Physics: 99/100, Mathematics: 96/100)

Certifications & Achievements

- **Microsoft Azure Certified**
- **Google Cloud Facilitator Program** — Google Cloud Platform
- Python for Everybody — University of Michigan (Coursera)
- Java & JavaScript Training — IIT Bombay
- Solved 250+ DSA problems on competitive coding platforms; 80+ GitHub repositories.
